Milestone 3

03/15/2017

Version 3.0

Feedback Summary

- Make "Welcome" larger
    - include "this is a project" in the welcome description
- Search bar category filter
    - Synchronize with sidebar (with color/shading)
        - I don't think we need to do this
    - Display category next to search field once selected
- Categories bar
    - Highlight current category
- Item page
    - Link to item page
- Buy item button
    - Wording too vague to suggest functionality
- Create post
    - Larger font, larger images, etc
    - Define image setup (one image or more?)
    - One image is fine
    - Cancel button
- Filters
    - Upper right
    - Condition, price
- Use empty space on page more
- Move about next to login/register
- Think about how the home button is used, and if it's needed
- Add cancel button to registration page
- Login page
    - Add "forgot password"
- Combine my account with open orders
- Messaging
    - Twilio okay'd
    - Make sure a reference to the post is sent to the parties
    - Make sure you include "okay to text me" to TOS
- Add remove item to open orders
- Update master more frequently
- Make it more obvious that dev is the working branch
- Maintain good coding practices and comment style

Priority 1 Functionality

Users:

- Users shall be able to search using categories. The categories shall be easily identifiable and labeled using common keywords that are familiar with college level academia.
- Users shall be able to search for specific items by a search bar. The search bar shall be conveniently placed at the top of most pages for quick access by any user.
- Users shall log in before they finalize and confirm any purchase.
- Users shall provide their San Francisco State email as part of registration.
- Users shall be able to navigate to individual item listings.
- Users shall browse through the "Featured" items page on the website. The "Featured" page shall display products from sellers.

Members:

- Members who are selling shall receive notifications when a buyer has confirmed purchase.
- Members shall be able to denote the conditions of their products.
- Members shall buy/sell services similar to how they buy items.

Admins:

- Administrators shall be able to delete posts that are deemed inappropriate or are in violation of the Terms of Service.
- Administrators shall not be able to modify posts.
- Administrators shall be able to suspend or remove accounts found to be in violation of the site's Terms of Use.
